EDUCATION

Caleb University

August 2024

Bachelor of Science in Biochemistry

GPA: 4.38/5.0

Relevant Coursework: Bioinformatics, Molecular Biology, Biochemistry, Genetics, Computer Applications, Statistics, Research Methodology, Data Analysis

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, TypeScript, HTML, CSS, SQL

Frameworks & Libraries: Spring Boot, Spring Security, Spring Data JPA, React, React Native, Next.js, Node.js, Tailwind CSS, Firebase, Redis, Expo, Expo Router

Cloud, DevOps & Platforms: Docker, PostgreSQL, EAS (Expo Application Services), Git, Networking, Render, Railway, Vercel, Redis, MySQL, Mongo

APIs & Integrations: Google Maps API, Paystack API, Agora SDK, QoreID (KYC), Firebase Cloud Messaging, Google Sign-In, Apple Sign-In, Twilio SMS, Resend Email, Sentry

Mobile & Real-Time: iOS Live Activities, VoIP Push (CallKeep / PushKit), WebSockets, Biometric Auth, Push Notifications (FCM / APNs)

Developer Tools: Visual Studio Code, Android Studio, Xcode, IntelliJ IDEA

EXPERIENCE

NaviaRide Technologies Ltd

Lagos | Remote

Software Engineer

01/2026 - Present

- Built and maintained a scalable Spring Boot backend powering trip management, wallets, KYC, notifications, and payment services.
- Integrated Google Maps, live location tracking, route visualization, geolocation services, and intelligent route-based matching system
- Led development of NaviaRide's React Native (Expo 54) app for iOS and Android, 50+ screens covering passenger booking, driver route management, trip-in-progress maps, earnings, and profile/settings.
- Managed mobile releases using Expo EAS Build, TestFlight, Google Play testing, and production deployment pipelines.

Oakalley Group

Abuja | Remote

Full-Stack Web Developer

10/2025 - 07/2026

- Designed and built three production web properties for a Nigeria-based business group: a Next.js financial brokerage platform, a business consulting marketing site, and a global auto-import consultancy site.
- Implemented backend API routes and server-side form handling with transactional email delivery for contact, loan, and import, workflows, replacing client-only mailto submissions with validation, success/error states, and environment-based config.
- Architected Oakalley Capital Solutions in Next.js 16, React 19, TypeScript, Tailwind CSS, and Framer Motion, with reusable, UI components, multi-step loan application flows (salary & collateral), document uploads, and structured pages for investment advisory.
- Managed end-to-end deployment and domain setup: registered domains via Namecheap, configured DNS and SSL, deployed the Next.js frontend to Vercel with Git-based CI/CD, and hosted backend/API services on Render.

Nevalar Technologies

Abuja | Remote

Software Engineering Intern

04/2025 - 10/2025

- Collaborated with a team of four to develop secure escrow backend using Node.js, TypeScript, Express, and MongoDB and APIs, increasing user engagement by 30%.
- Built a high-performance backend with Node and integrated Redis caching, reducing response times by 20%.
- Containerized and deployed the application using Docker, improving deployment efficiency by 50%.

New Horizons Learning Institute

Ikeja, Lagos | Hybrid

Software Engineering Intern(Java)

01/2025 - 12/2025

- Designed the backend of a banking application using Spring Boot Implemented authentication and authorization mechanisms.
- Stored and managed user data (e.g., account details, balances, and transaction history) securely in a MySQL database.
- Gained hands-on experience with API development, database integration, and application deployment.

Caleb University

Imota, Lagos

Google Developer Student Club Backend Lead

04/2022 - 08/2024

- Leading the development and maintenance of backend systems, including server-side applications and Databases
- Gathered, defined, and analyzed customer requirements to build clear project plans and product functionality.
- Supported development, quality assurance, and Frontend team during weekly code review meetings.
- Collaborated across the software development lifecycle, from requirement gathering to production releases.

Mactavis Digital

Yaba, Lagos

Software Engineer Intern

05/2022 - 05/2023

- Designed and launched a responsive sign-in and sign-up interface using React and CSS, enhancing navigation across devices and boosting user retention by 18%.
- Engineered a high-performance search functionality using MongoDB and Node.js, reducing data retrieval time by 50% and improving user satisfaction ratings.
- Implemented Stripe API integration with Node.js and Express, establishing secure payment processing for 500+ clients and improving transaction speed by 40%.

PROJECTS

Health and Fitness tracker

- Developed a full-stack fitness tracking application using Spring Boot, React, TypeScript, and MySQL.
- Designed and implemented secure RESTful APIs with Spring Security and JWT authentication, enabling protected auth.
- Improved responsiveness and scrolling performance through optimized API handling and caching.
- Structured the backend using a modular, layered architecture following Spring Boot best practices for scalability.

Bank Application - Backend

- Developed a bank application using Java and Spring Boot, ensuring a scalable architecture for secure transactions
- Integrated Spring Security for JWT-based authentication and role-based access control (RBAC), ensuring secure user access.
- Utilized Spring Data JPA with MySQL for persistent data storage, managing user data, account balances, and transaction records.
- Implemented CI/CD through GitHub Actions for smooth deployment and automated testing.

Customer management System

- Built a Customer Management System using Spring Boot with Spring Web to create a robust backend application.
- Employed Spring Data JPA for easy and efficient data access, allowing streamlined interaction with the PostgreSQL database.
- Configured PostgreSQL to run in a Docker container, ensuring a consistent environment and simplifying database setup.
- Implemented continuous integration tests for seamless updates and smoother functionality.

Calculator App

- Developed a calculator application using Java and JavaFX for the graphical user interface.
- Designed a user-friendly GUI with intuitive button layouts and real-time input display using JavaFX.
- Optimized the calculator for high performance and fast computation of results.

Uber Clone

- Developed a full-stack Uber clone with a multi-screen interface using React Native, Expo, and TypeScript, implementing Expo Router and Zustand for state management.
- Integrated Google Maps and Places APIs for real-time location tracking and ride matching, providing live updates and accurate mapping.
- Implemented secure payment processing with paystack and robust authentication using JWT, leveraging PostgreSQL for efficient data management.
- Optimized cross-platform performance and UI design with Tailwind CSS to ensure faster load speeds and consistent interfaces across iOS and Android.

Online Examination Management System

- Developed an Online Exam System using Java and MySQL for backend data management, , featuring a JavaFX frontend for an intuitive user interface.
- Designed and implemented a relational database schema to store and manage exam data, including user profiles and questions.
- Utilized JDBC to establish secure connections between the application and MySQL database, enabling seamless data retrieval.
- Optimized database queries for efficient data retrieval, ensuring minimal response times during exams.
